WinTrade Upgrade.

WinTrade is being upgraded with new features and more flexibility to make managing your trade transactions simpler and faster.

New WinTrade features.

New Feature	Details
Modern interface	New screens, menus and simpler workflows for easier management of your trade transactions and documentation.
Multi-browser access	Access WinTrade with the latest version of your preferred web browser. Internet Explorer, Microsoft Edge, Google Chrome, Firefox and Safari are supported.
Access on the go	View transactions via the web browser on your mobile phone or tablet.
Flexible data exports	Four new data export options: CSV, XML, HTML, JSON. No change to current XLSX (Microsoft Excel) and PDF export options.
New reports	Two new reports are available: • Accrued interest. • Total interest paid. Available in CSV, PDF, XML, XLSX (Microsoft Excel).
Personalised system setup	Set notification message frequency and record events and reminders in an online diary.
Quick access views of key information	**'History':** see a transaction's past events. **'View Original':** see original documents after amending the Letter of Credit. **'Multiple drawings':** see details of a Letter of Credit's multiple drawings. **'Action date':** request transactions to be processed at a future date.
Navigation self-help	Onscreen help text is displayed for key buttons to explain function.

How to prepare for the WinTrade Upgrade.
