Data as at 8.00am. Change from previous trading day (excluding the SFE which is the change during the night session). Source: Bloomberg.

**Main Themes:** Soft economic news and profit taking in equity markets saw risk aversion take hold overnight.

**Share Markets:** US and European markets were bathed in red ink overnight. Technology stocks pushed US markets down while economic weakness weighed on European sentiment. The Dow fell 2.2% while the German Dax was down 1.0%

**Interest Rates:** There was little movement in US interest rates. US 10-year bond yields slipped four basis points to 0.68%. In line with economic weakness in Japan and Europe (see GDP data below) 10-year bond yields fell 3 basis points in Germany and one basis point in Japan.

**Foreign Exchange:** The US dollar index rose overnight pushing the AUD lower. The AUD fell from a high of \$0.7309 US cents to US\$0.7206 this morning.

**Commodities:** West Texas Crude oil fell over 5% overnight on increased supply out of OPEC and on stalling recovery in Asia. Gold was marginally weaker and iron ore marginally stronger.

**Australia:** Weekly payrolls rose 0.3% in the fortnight to 22 August. They are now down 4.2% since mid-March when the lockdowns began. At their low, payrolls were down 8.5% in mid-April. Victoria, at 7.9% below the mid-March level remains the hardest hit State while WA at just 1.0% below has

seen the best recovery in jobs.

There was a mixed result from the latest monthly NAB Business survey. After three consecutive months of improvement, business conditions deteriorated in August, to -6 from 8 in July. The resurgence of cases in Victoria and the lockdown measures from early August have unsurprisingly had a detrimental impact on businesses. However, containment of new COVID-19 cases and a recovery in other States has likely prevented a bigger fall. Business confidence improved from -14 in July to -8 in August, still well below the long run average.

**China:** No major data released.

**Japan:** Final GDP for the June quarter fell at a revised, seasonally adjusted, annual rate of 28.1%. The actual decline in the June quarter was 7.9%. Over the year to June, Japan's GDP fell 9.9%.

**Europe:** GDP in Europe fell 21.1% in the June quarter to be down 15.0% over the year. Employment slipped 2.8% in the quarter having fallen 0.2% in the March quarter.

**United Kingdom:** There were no major economic statistics but Covid-19 cases surged to their highest daily level since May. At the same time, Britain's exit plans from the EU are causing concerns in the UK and Europe.

**United States:** Consumer credit rose in July for a second month as the economy opened up and

spending lifted. Total consumer credit rose at an annualised rate of 3.6% in July.

**Today's key data and events:**

AU WBC-MI Consumer Sentiment Sep prev 79.5 (10.30am)

AU Housing Finance Jul (11.:30am)

– Value of Total exp 4.0% prev 6.2%
